

Playwright Locator Methods - Quick Reference Chart

Locator Method	What It Finds	When to Use It
<code>page.getByAltText()</code>	Elements based on alt attribute	Best for images or icons
<code>page.getByText()</code>	Elements containing visible text	Non-interactive text elements
<code>page.getByRole()</code>	Elements by role (button, link, etc.)	Interactive elements
<code>page.getByLabel()</code>	Form controls with visible label	Form inputs, radio buttons, etc.
<code>page.getByPlaceholder()</code>	Inputs with placeholder text	Search boxes, unlabeled inputs
<code>page.getByTitle()</code>	Elements with title attribute	When title provides meaning
<code>page.getByTestId()</code>	Elements by data-test-id	Stable locators for automation
